

CIRCULAR RESTAURANTS

FROM FRYERS TO FUELS

Restaurants in this community are doing something about climate change—partnering with biofuels producers like Neste, SeQuential, and Mahoney to turn our used cooking oil into clean-burning transportation fuels.

By dining with us, you're helping us cut climate and air pollution from vehicles – helping our lungs and the local economy.

You can do more by joining us in asking the Washington Legislature to pass a Clean Fuel Standard—making all of our fuels cleaner, supporting local jobs, and giving us choices beyond fossil fuels for how we get around.

Visit cleanfuelswork.org for more information.
