

# CLEAN FUELS

## A MENU OF BENEFITS

### **SECURES OUR HEALTH + SAVES MILLIONS IN HEALTHCARE COSTS**

Air pollution leads to and makes worse childhood asthma, lung cancer, heart disease and other health problems.

---

### **CREATES RURAL + URBAN JOBS IN WASHINGTON'S CLEAN ENERGY ECONOMY**

Washington already supports many jobs in the clean fuels industry—but right now many of these fuels go out of state. Creating a market for those fuels here at home will expand jobs and keep more of our money in our own communities

---

### **PROTECTS FRONTLINE COMMUNITIES**

The health impacts and environmental harms caused by fossil fuel pollution are unjustly concentrated among low income communities and BIPOC communities.

---

### **SAFEGUARDS OUR ENVIRONMENT**

Clean fuels produced and sold in Washington will only come from sustainable sources—promoting sound agriculture and leading to less air pollution.

---

### **REDUCES CLIMATE POLLUTION**

Our state cannot achieve our pollution reduction goals without reducing the largest source of the emissions that cause climate change: tailpipe pollution.
